Curl Guide

Curly Hair at

Salon
1827

Today, more than 60% of women have curly hair, and no two curls are a like. What most complain about is frizz. Frizz isn't a hair type; it's just a curl waiting to happen. Each curl has an individual structure; Salon 1827's Curl Specialists will help build your collection of products to complement each curl type. Curly hair inherently needs more moisture than any other hair type. We are always dedicated to bring out the best in your curls.

Salon 1827's CurlCut is our signature cut for curls, it's a revolutionary cutting technique for all natural textures, from wavy to super curly. Hair is sculpted curl-by-curl, while dry, in its natural state according to your lifestyle and preference. This service is a personalized CurlCut product prescription that makes it easy to maintain your style at home.

Curly hair needs three times more moisture than any other hair type. There is no such thing as over conditioning, and co-washing is your best friend. It is the only hair type where you follow the same routine every day and get completely different results every time (like seriously, you never know what you will get). Below you will find a method that works for most lifestyles. Want a customized routine? Book a consult with one of our Curl Specialists at www.Salon1827.com.

Routine

Day 1: Wash Day (otherwise known as Sunday in my house) Shampoo*, conditioning mask or regular conditioner, leave-in, styling cream, oil, (if wavy leave-in and cream is sufficient no need for the oil). Diffuse (only about 50% on high-medium heat and low airpower) or air dry.

Day 2: Restyle- Spray liberally with a leave-in conditioner to reactivate and reform curl, then an alcohol-free hairspray*

Day 3: Repeat Day 2

Day 4: Repeat Day 1- Skipping Shampoo and using only your regular conditioner called co-washing or conditioner rinsing, continue with the rest of the day one routine.

Day 5, 6, 7: Restyle or any variation of above. Figure out what works for you.

Helpful Tips

- ★ When combing, be sure to use a wide-tooth comb NEVER a brush or your fingers
- ★ Never sleep on wet hair, curly hair is fragile when wet, and it breaks while you sleep
- ★ It's crucial to use a sulfate-free shampoo if you color your hair and because shampoos that contain sulfates have silicones that can build up in the hair and weigh down your curls.
- ★ No alcohol in your products, it's incredibly drying to curly hair, it's best to avoid or limit use.
- ★ Sleep with a satin pillowcase or use a satin bonnet. Pull your curls piled as far on top of your head loosely with a clip or scrunchy. You can also use a silk scarf to wrap your hair.

Thank You!
